

EDIT PROGRESS - INFORMATION

The Instance / Edit / Progress screen was added for the AOIC Socrata data integration. It is designed to collect up to four types of information, depending on the caseload being reported:

Problem Solving Courts / Specialty Court (PSC)

- Phase transition dates [this is also where Phase End surveys are initiated]
- Incentives awarded
- Sanction Basis noted (reasons sanctions are given)
- Sanctions given (pre-violation)

Probation (PRB)

- Incentives (not reported in new stats, only available to record information for your use)
- Sanction Basis noted (reasons sanctions are given)
- Sanctions given (pre-violation)

Pretrial (PTS)

- Sanction Basis noted (reasons sanctions are given)

When you open Edit Progress from instances of these types, only the above sections of the screen will provide stat data to the Socrata Data & Insights repository.

However, officers have requested leaving the Incentives section available for marking progress actions even for Probation. The Incentives section is displayed starting with this update -- but Probation incentives are NOT reported statistically.
