

JIMAS IMAGING is a **paperless, digital document management solution** for compact storage and easy retrieval of documents. It is part of our integrated suite of applications for the justice system.

- **Archive closed cases and monitor current cases.**
- **Become paperless** -- replace paper documents with **scanned images in the court room.**
- **Reduce costs** -- by sharing one JIMAS IMAGING system between different offices.
- Digital case documents are kept **independent & secure** for Prosecutor, Circuit Clerk and Probation offices.

Digital Access is safer and easier

- No retrieving closed files from storage.
- Setup security measures for different users, ranging from View-only to Scan & Store.
- For microfilming, export documents to a CD, which decreases storage costs and lowers microfilming costs.

Digital Data is secure

- Security is linked to JIMS and your iSeries/AS400, providing single-point access control to juvenile, impounded & other sensitive cases.
- **NOW!** Secure a document so that it can only be viewed by authorized users. For added flexibility, secure the whole case, the litigant, a particular document, or a specific folder containing digital documents.

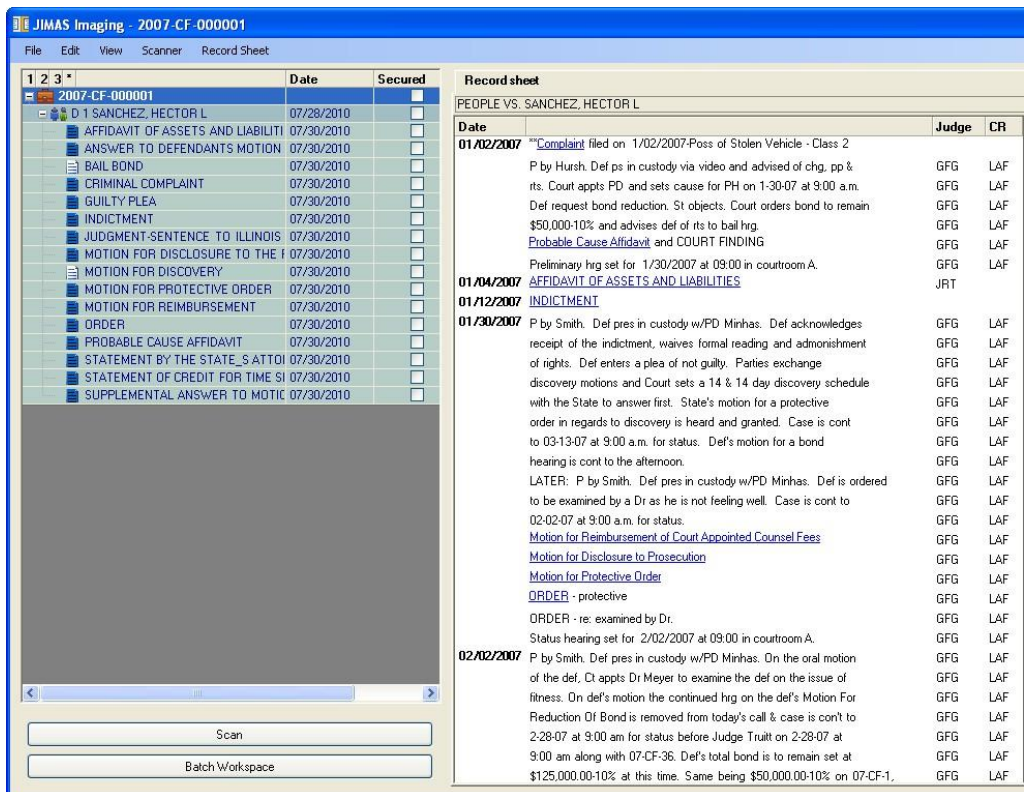

The Difference

Within JIMAS IMAGING, your digital images can be linked to your JIMS record sheet and **accessed with one click.** What is more, with JIMAS IMAGING, **no additional cost** will be required to integrate with **e-Filing** programs.

SCANNING

Scan & store images by case number - or use another referent (a name or other number code) when a case number is not yet available

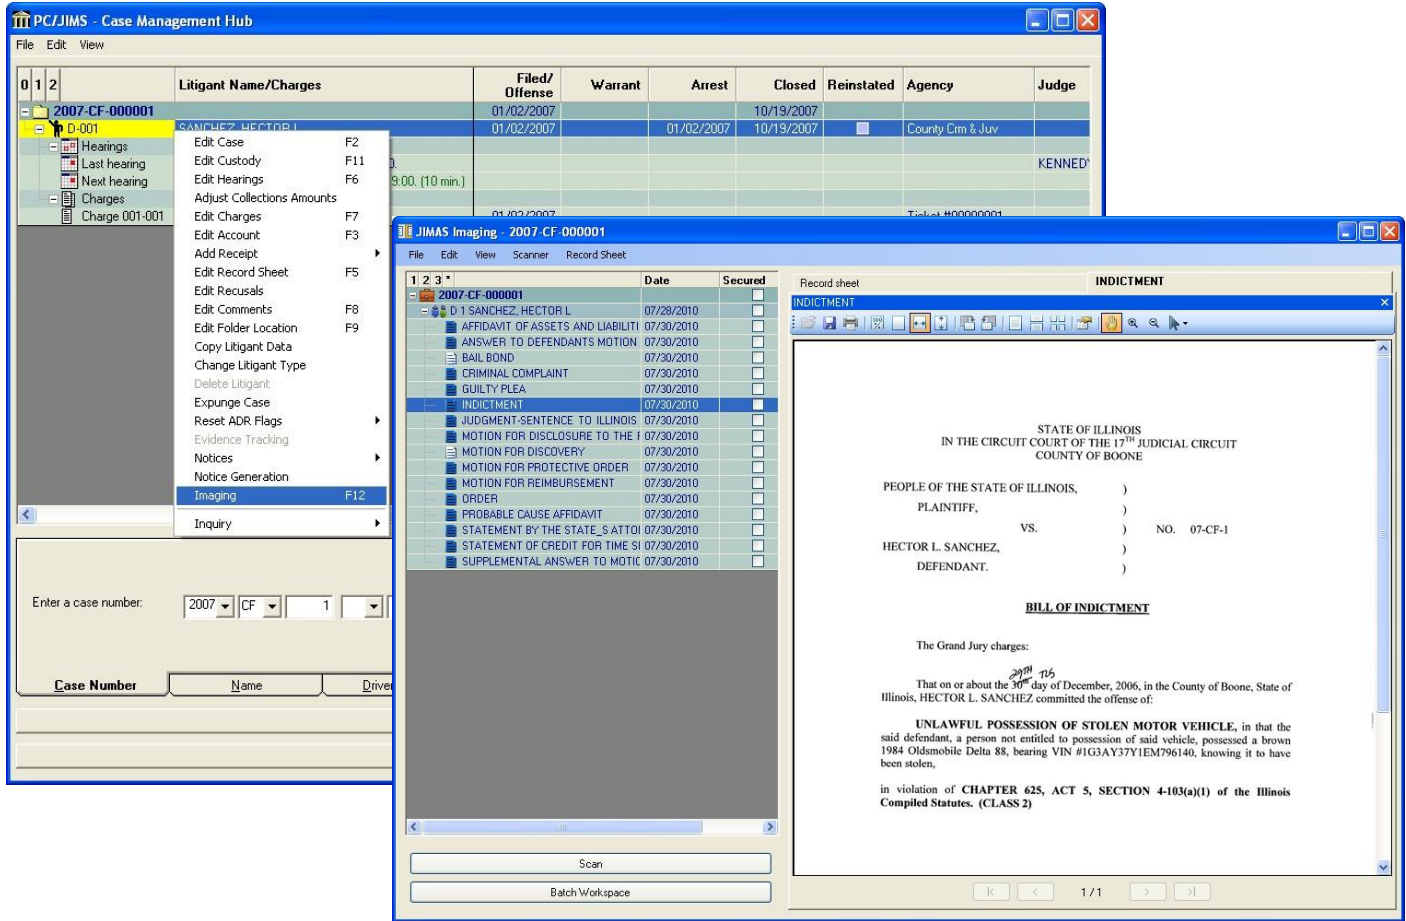

- Scan single or batch documents on existing JIMS cases
- **NEW! Batch Work Space**
Scan a batch of documents, then dump them all at once into a case folder
- Import **digital audio & video** files for organized storage and easy retrieval
- **Circuit Clerk** -- Link images to docket entries in JIMS record sheet so that they are accessible with just one click

USING SCANNED IMAGES

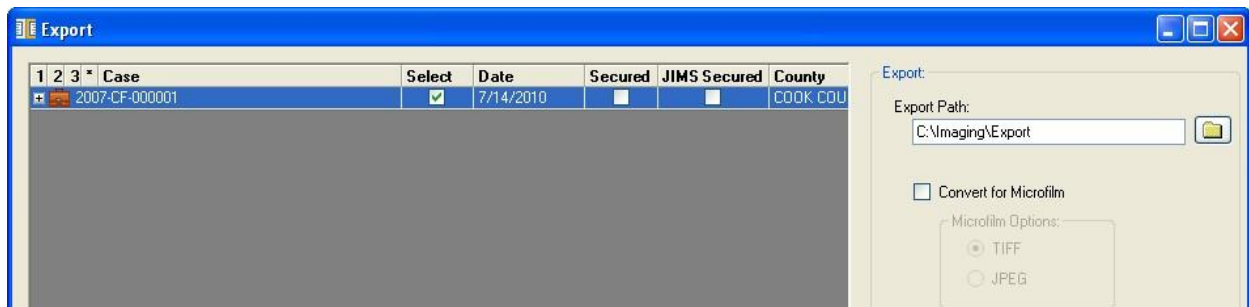

Access images directly from PC JIMS

- Access all authorized case-associated images from your PC JIMS case management hub.
- **NEW! Tabbed Viewing** - Use tabs to open multiple documents for viewing.

Scan/View/Print/Export

- Save on Storage - View & print digital documents for clients whose paper documents have been destroyed.
- **PROBATION NOTE!** Access all authorized **Court & Probation** case-associated images.
- Export digital documents to ICOTS standards for Interstate & Intrastate Compact compliance.
