Integrated judicial software solutions for Courts • State's Attorney • Probation • Jury

The legacy of JIMS, the power and ease of PCs

PC JIMS CHILD SUPPORT is a modern graphical user interface (GUI) that simplifies many of the routine tasks performed by Clerk staff. GUIs have elements now familiar to most everyone from Microsoft Windows® programs and internet web pages. Standard elements like drop-down lists and drop-down menus allow new users to learn the program rapidly.

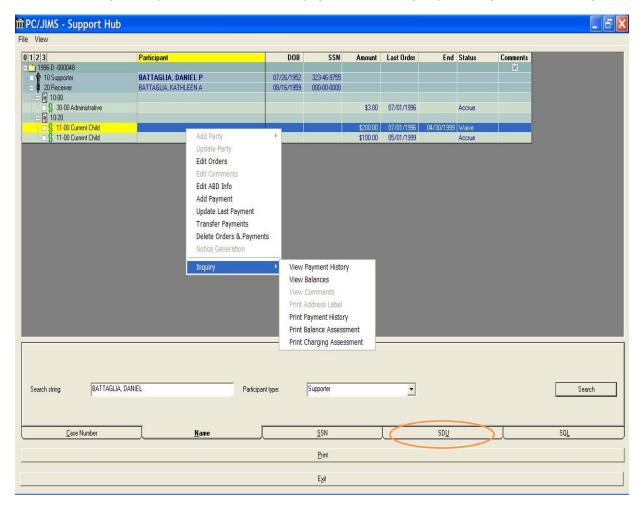

PC IIMS CHILD SUPPORT is a full-featured applications package capable of accommodating

- Address information for all parties such as payors, payees, employers, guardians and children
- Separate account lines with balances for child support, spousal support, medical bills, attorney fees, miscellaneous ordered support and arrears orders for the same
- Order cycles such as monthly, semi-monthly, bi-monthly, weekly, bi-weekly and more
- Temporary changes to support orders
- Custody reversals

The Child Support Hub

One central location from which you can perform all case-related data access and data entry.

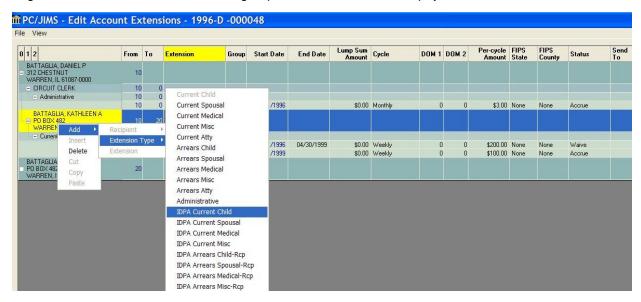

- Data entry options vary depending upon whether you are editing a party or an account.
- Locate support cases with various search options, including by Name, SSN or Court Case Number
- The SDU tab allows you to upload data from an SDU payments file that you previously downloaded to your PC.

PC JIMS CHILD SUPPORT

Editing Account Information

- PC IIMS CHILD SUPPORT provides various **Extension Types** for setting up account lines.
- Account lines can be identified as to who should receive payments the Recipient, IDPA or the SDU. Payments being sent to IDPA and the SDU can be grouped into one check when payments are disbursed.
